

The Demerara

400 SQ FT • 1 BEDROOM • 1 BATH • KITCHEN • BUILT BY 4 SKILLED WORKERS IN 4 DAYS

Every family deserves a home that stands strong against sun, rain, and time. **Golden Shield Homes**, working in cooperation with the Ministry of Housing of Guyana, is your guide to home ownership: a complete, move-in-ready home, factory-crafted with advanced materials and assembled on your foundation in days, not months.

BUILT DIFFERENT. BUILT TO LAST.

Cool, insulated walls. The strength of steel keeps your family safe. Factory-built quality protects your investment with a home that lasts.

Sandstone-textured exterior. A handsome, durable finish engineered to shrug off tropical sun and driving rain, year after year.

Smooth interior walls. Bright, seamless, and easy to clean — a fresh canvas to make your own.

Steel roof, long-lasting finish. Color-coated American steel roofing panels. The engineered rib profile with siphon groove channels heavy tropical rain away, resists wind damage and deterioration, and requires virtually no maintenance.

Vinyl-covered floors. Comfortable underfoot, water-resistant, and simple to maintain.

LED lighting throughout. Bright, modern light with low power bills.

Move in. Plant your garden. Watch your children grow — in a home that protects them and builds your family's future from day one.
